

ROSIE INMAN

Graphic Designer

I am from a small town outside of Indianapolis, where I began to explore my artistic side from a young age. I enjoy being creative and incorporating my artistic capabilities in a professional manner. I thoroughly enjoy branding, editorial print/photography design, as well as illustration in any form. I have learned from my internships, work, and education that design is a useful tool when used correctly. I am motivated to delivering my best work and providing the opportunity for others to gain a new appreciation for their project with my design work.
